Nancy Keenan, Superintendent  
Office of Public Instruction

MONTANA STATE LIBRARY

3 0864 0009 9216 7

# Dear Friends:

During the past six years, Montana has faced a host of challenges. The world as we have known it is changing daily. The number of people moving to Montana has caused an increase in school enrollment, property values, and prison populations. Technology has changed the way we communicate, the way we work, and the way we learn.

Many of these changes create challenges for Montanans, but many can also present opportunities — for our state, our communities, and our students. It just takes planning and preparation. At the same time, however, ignoring or failing to plan for these changes is a recipe for disaster. Nowhere is this more true than in Montana's schools.

The publication of *A Nation at Risk* in 1983 focused the attention of the public, policymakers, and educators on the consequences of inaction. Since then, public concern has continued to increase. In 1996, a Gallup-Poll commissioned by CNN and USA Today found that education for the first time surpassed crime and economy as the public's most pressing concern.

Following this increasing public concern, Governors Tommy Thompson of Wisconsin and Bob Miller of Nevada called together a National Education Summit which was held in March of 1996. That summit assembled 48 of the nation's governors and 48 prominent business leaders. They called for concentrated action on the part of state leaders to help improve their state's schools. At a follow-up State Education Improvement Partnership Conference this summer, state leaders agreed upon the following:

- High academic standards are important to improving educational performance of all students;
- Assessment and accountability issues are sensitive and require strong leadership from state policymakers and educators;
- Public engagement and parental and community involvement are critical components of effective school reform;
- Collaboration among government, schools, and communities, and across agencies and disciplines can ensure that local school improvement strategies are implemented efficiently, efforts are not duplicated, and best practices are shared; and
- Improvements in professional development and teacher preparation must be an integral part of states' systemic education improvement plans.

We need to make sure that Montana's children are prepared for their future, and we all have a role to play in making Montana's good schools better. Supporting our schools and students requires investment — in both time and money — on the part of our leaders, legislators, the Office of Public Instruction, and local school districts and communities.

I look forward to working with each of you to make sure that Montana's students do not get left behind.

Sincerely,

Nancy Keenan

# How Montana schools are doing...

**F**or many years Montana students have graduated from high school well-prepared to meet the demands of their future. This, however, is no longer a fact we can take for granted; times are changing rapidly, and schools must respond. Our students need to be prepared to compete in a workplace that requires new knowledge and skills, especially in the area of technology.

**W**hile there are many indications that Montana schools contribute to our students' eventual success, there are also several areas where the news is less positive. To fully understand the challenges and opportunities facing our schools and students today, both sides must be considered.

## Student achievement

- Not only are Montana students' ACT and SAT scores significantly higher than the national average, their test scores are also higher than they were five years ago (see graphs on this page).
- In 1990, Montana's eighth graders ranked second in the nation on the National Assessment for Educational Process (NAEP) math tests. In 1994, Montana's fourth graders ranked eighth on NAEP reading tests—with no statistical difference between Montana and the top scoring states.
- Data from the last Armed Services Vocational Aptitude Battery show that Montana high school graduates who enter the armed services have the highest state average scores on this qualification test.

*On the average, Montana students score 10 to 20 percent higher than the national average on standardized tests.*

## on the other hand...

**M**ontana high school graduates who do not take those classes recommended for college-bound students score 16 percent lower on college readiness tests than students who do take those classes.

**F**orty-nine percent of Montana's high school graduates do not immediately go on to college.

SAT scores 1992-1996

ACT scores 1992-1996

Note the difference between Montana's scores and the national average.

Society no longer has a place for an uneducated population. Last year, only 3.7 percent of Montana high school students dropped out of school, but 1,800 dropouts in one year is too many.

## Course offerings

- The Advanced Placement (AP) courses available to Montana high school students increased tremendously over the past ten years:
  - 3 times as many schools are offering AP courses;
  - 5 times as many students are taking AP courses; and
  - 6 times as many AP exams are given.
- Compared to five years ago, more Montana ACT test-takers are taking the classes recommended for college-bound students.
- Eighteen thousand Montana students in 71 high schools participate in Tech Prep programs that connect students' high school course work with the first two years of college technical programs.
- In the 19 Montana high schools that offer a cooperative education program, an average of 50 students have gained paid work experience that complements their courses.

### *on the other hand...*

Just two years ago, in school year 1994-95, the outdated, low-tech Apple IIe computer comprised one-third of the computers in schools. That same year only 19 percent of Montana's schools were connected to the Internet.

Learner Goals for subject areas were developed in the 1980s and have not been updated.

## Schools preparing students for success

- Data from the 1990 Census show that Montana's student completion rate for both high school and higher education ranks eighth best in the nation.
- Data from the 1990 Census reveal that the education level of Montana's general population is not only high but that it increased 30 percent between 1970 and 1990. In 1990, 89 percent of Montana adults had high school degrees, while the national rate was 82 percent.
- College enrollment figures show that 51 percent of Montana's high school students enroll in college within one year of their graduation. Over time, approximately 70 percent of Montana's high school graduates will enroll in college.
- In only one state do more American Indian students enroll in higher education than in Montana.

### *on the other hand...*

Dropout Rates indicate that over 1,800 students dropped out of Montana's high schools in 1994-95. Those rates show that American Indian students are 3.5 times more likely to drop out of school as other students.

While 51 percent of Montana's high school graduates immediately enroll in college, only about 25 percent complete their degree.

## School environment

- In a recent survey, Montana teachers expressed more confidence than their colleagues in all but two other states that their students were coming to school prepared to learn.

### *on the other hand...*

Montana ranks 15th in the nation for the percentage of school-age children who live in poverty.

Montana's child death rate ranks 14th highest and Montana's violent youth death rate ranks 11th highest in the nation.

During the 1994-95 school year, 19 students were expelled for bringing a firearm to school.

In Montana, nearly 30 percent of the total reported arrests are of people under the age of 18. This is the third highest rate in the nation.

Montana ranks 14th highest in the rate of juveniles in custody in the nation.

Montana has the fifth highest teenage suicide rate in the nation.

- Data from the Montana Youth Risk Behavior Survey (YRBS) show a six-year decline in the frequency that Montana youth engage in physical fighting.
- Eighty-five percent of Montana's school districts (representing 98 percent of Montana's school children) have programs for students designed to reduce youth violence, youth alcohol and drug abuse, and other at-risk behaviors.
- Every year more than 500 Montana teachers and school staff receive training in programs and other materials that help them promote healthy choices on the part of their students.
- Research shows that when parents are involved in their children's learning, the children earn higher grades, score higher on tests, and stay in school longer.<sup>1</sup>
- A large percentage of Montana parents are involved in school open houses, back-to-school nights, parent teacher conferences, arts and sports events, and science fairs or academic demonstrations; all contributing to their children's learning and success in school.

*When violence enters a school, the first victim is learning. School violence involves more than guns, knives, and gangs. It also manifests as insults, intimidation, and intolerance. Violence damages the minds and hearts of Montana students and educators.<sup>2</sup>*

<sup>1</sup>more information on this can be found in "Strong Families, Strong Schools," a 1994 report published by the U.S. Department of Education.

<sup>2</sup>adapted from the Association for Supervision and Curriculum Development Infobrief "Policies for Safety, Caring, and Achievement" written by Joan Montgomery Halford.

# Accountable school improvement

**A** new school improvement proposal from the Office of Public Instruction enables communities to improve their schools. The proposal will provide parents, policy makers, educators, and the general public with the information and technical help they need to identify problem areas in their schools and to implement effective changes at the local level.

**W**orking together, Montanans will be able to evaluate the educational quality of their schools, target their resources, and make informed decisions about how best to continue improving the education offered Montana's children.

## *OPI's school improvement proposal*

*It is no longer good enough to know if students are above or below average; we need to find out whether they are able to attain the standards to which the real world will hold them accountable.*

## *Why set high standards?*

Setting high standards for learning:

- provides clear expectations for students, schools and systems;
- establishes a yardstick for how good is good enough;
- allows focused decision-making based on common information; and
- guides the direction for change, future needs, and technologies.

Hundreds of Montana teachers, parents, and other community members worked together in the 1980s to set the standards that currently determine what is taught in our classrooms. Although they were developed prior to widespread use of email, the Internet, and even computer networks, those standards have not been revised to reflect these developments and the changing educational needs and new opportunities those developments represent.

## *How do we measure our schools' quality?*

By establishing an accountability system that provides for:

- meaningful measures of progress that the public has identified as valuable in determining the quality of schools, including:
  - student achievement*: standardized tests and performance levels
  - school environment*: safety, parent satisfaction, and community volunteers
  - course offerings*: basic and advanced courses, technology, and access to school-to-work opportunities
  - school success*: honors, accomplishments, graduation rate
- clear and understandable reporting on the progress of students and schools toward high levels of expected performance.

## *How do we provide information for school improvement?*

By giving parents, educators, and communities a means that they can use to understand how their local schools and students measure up to community expectations and compare to other schools around the state, nation, and world through:

- a statewide profile of Montana schools that will help gauge the effectiveness of Montana's educational system; and
- a local profile containing local measures of progress that allow parents, educators, and other community members to evaluate the effectiveness of their local schools.

## 4 *How do we provide direction for school improvement?*

By assisting educators and community members to use the information in the statewide and local school profiles to:

- identify the strengths and weaknesses of their local schools;
- pinpoint the probable causes of those identified strengths and weaknesses; and
- develop a constructive plan for local school improvement that targets local resources and focuses local efforts on those causes of concern.

### *How will the school accountability process improve schools?*

By making all Montanans aware not only of statewide and local expectations for students and school systems, but also of the strengths and weaknesses of their local schools, the school accountability process will give every Montanan the ability to:

- form a factual picture of the work that is done in Montana's schools and the challenges and opportunities educators and students face every day;
- obtain information about statewide and national educational standards and the way their local schools measure up;
- weigh the information and make informed decisions about how to improve Montana's schools; and
- get involved to make their local schools better.

### *OPI's legislative proposal...*

**T**he Office of Public Instruction's school improvement proposal specifically addresses the four steps in the Cycle of Accountable School Improvement. The proposal is designed to involve Montanans in the process to:

- ✓ review and revise Montana's academic standards developed in the 1980s to include new developments like technology in order to ensure high levels of achievement for all students;
- ✓ identify key indicators and measures of educational quality;
- ✓ gather data for the educational quality measures;
- ✓ prepare a statewide profile and report on those indicators that measure the effectiveness of the educational system;
- ✓ assist school districts to develop profiles to provide communities with local measures of those indicators, as well as other useful information about school effectiveness; and
- ✓ help educators and community members identify how to evaluate and improve their local schools.

### *What role does technology play?*

**T**echnology is an important tool necessary both to provide a quality education for Montana's students and to implement the other steps of the school improvement cycle.

- Technology expands the educational resources available to Montana schools. The potential for increased course offerings and better teaching and learning is of great importance, especially for Montana's smaller, rural schools.
- In order to be employable in tomorrow's workplace, Montana students will need basic skills in using various forms of technology.
- Technology and electronic data management will be an essential tool for collecting data to measure and report school improvement.

## *Strategies for accountable school improvement*

### **Goal: Improve schools**

Strategy: Make and implement information-based decisions.

### **Goal: Set High Standards**

Strategy: Review Montana Learner Goals.

## *Strategies for Accountable School Improvement*

### **Goal: Measure Quality**

Strategy: Set performance measures and gather data on them.

### **Goal: Provide information for school improvement.**

Strategy: Develop and report the educational profile.

# Enrollment Growth

Cumulative 1990 to Present

K-12 enrollment in Montana has increased by 13,400 students since 1991.

Interestingly, K-6 enrollment has been declining since 1992 while growth continues in 7-8 enrollment and high school enrollment. This indicates that while Montanans are slowing in their birth rate, people continue to move into the state bringing older children (who are more expensive to educate).

# Budgets Grow Slowly

Total spending is up 14.7% since 1991

Under state law, schools are required to set a minimum (BASE) budget to provide equal access to quality education. Montana's schools continue to budget between the BASE and the maximum budget. School general fund budgets in total have only grown 14.7% since 1991. Inflation during the same period has been over 16%.

# Local Control Works

Budget per ANB is up only 3% over 1991

The best measure of how responsible schools have been with state and local taxpayer dollars is the budget per student (ANB) figures. Using that measure, Montana's schools have increased their per student budgets by only 3% since 1991.

# Local Taxes Cover State Cuts

School budgets per ANB now below 1993 levels

School budgets per student today are actually lower than they were in 1993. At the same time, inflation has reduced school purchasing power by over 16%. Do 1997 students deserve the same level of educational quality (as measured by per student spending) as students in 1993 received?

# School General Fund Budgets

*Fiscal Years 1991 through 1996*

# STATUS OF SCHOOL EQUALIZATION 1997

# Schools responding to community needs

**L**ike the children they serve, schools are influenced by changes in their communities. Developments in technology have changed the complexion of the working world and the expectations employers place on their employees. State and federal legislation and funding also have a great impact on the work that schools do. This section outlines three major areas and their implications for education, schools, and communities in Montana.

## *The new Welfare Reform Act*

**S**igned into law in August of 1996, the new Welfare Reform Act is a comprehensive piece of legislation with far-reaching implications for public education.

The Act places primary emphasis on work and getting people to work quickly. As a result, the new welfare law will challenge schools to keep students in school, to prepare them adequately for work, and to make sure they have adequate opportunities.

### *Implications for education:*

- ✓ With only 29 sites in the state, the demand for GED education may exceed current offerings.
- ✓ New demands will be made for effective alternative educational models to meet the needs of teen parents reentering high school.
- ✓ High school vocational education programs may become sites for adult training and will see increased demands.

### *Provisions in the New Welfare Reform Act:*

- Adults cannot continue to receive benefits after 24 months unless they participate in a work program. Vocational educational training, attendance at a secondary school, and GED study are defined within the law as allowable work activities.
- A teen parent under age 20 can count attendance at a secondary school, a GED program, or participation in education directly related to employment as meeting the work requirement.
- Unmarried teen parents must go to high school or GED classes or participate in training programs to continue to get assistance. They must also live at home or in an approved adult-supervised setting.

*Schools are a mirror of our society. As our communities change, so do the needs of our children and so do the needs of our schools.*

*Over the past eight years the number of students with emotional disturbance in our schools has nearly doubled.*

## *Managed mental health care*

**T**he Department of Public Health and Human Services (DPHHS) awarded a five-year contract for managed mental health care in Montana. Montana's Mental Health Access Plan (MHAP) is a first-in-the-nation effort to integrate funding for all public mental health services. It is anticipated that the MHAP will dramatically change public school access to mental health care services.

Provisions in the newly awarded contract:

- The new managed care system will be operated by Montana Community Partners, a non-profit joint venture between CMG Health, a Maryland-based, for-profit corporation, and the Care Coalition of Montana, a non-profit Montana corporation comprised of 15 Montana non-profit human services organizations.
- Montana Community Partners will be responsible for all services starting April 1, 1997.
- At approximately \$80 million per year, this contract is the largest contract ever awarded by the state of Montana.
- The Mental Health Access Plan will emphasize community-based rather than centralized services.

### *Implications for education:*

- ✓ Managed care is likely to reduce the number of residential placements, thus increasing the number of children with emotional disturbance in our public schools.
- ✓ Managed Care provides the opportunity to improve coordination between mental health care and education through participation on student Individualized Education Programs (IEPs).
- ✓ Schools will be the only remaining public entity responsible for serving children with emotional disturbance where family income is above 200 percent of poverty.

## Federal programs:

**M**ontana is one of the few states that receives more money from the federal government than its residents pay in federal income taxes, and Montana students reap some of the benefits. The Office of Public Instruction administers programs which support state and local efforts to increase educational opportunity and help schools meet the needs of local students and communities.

Federal provisions for education in Montana:

### *Implications for education:*

- ✓ Federal programs provide Montana's students, families, and teachers with important services and educational opportunities that local schools and communities could not otherwise afford.
- ✓ By helping stretch local and state dollars, federal money allows communities to support local educational efforts.
- ✓ Federal programs provide jobs for people who live in Montana communities.

Montana schools received almost \$60 million in federal money for school year 1995-96.

- During the 1995-96 school year, Montana schools received a total of \$59,768,186 in federal funds from the federal education programs available to Montana's school districts.
- Only eight Montana counties received less than \$100,000 in federal funds for educational use during the last school year. Sixteen Montana counties received over \$1 million and 12 Montana counties received over \$500,000 in federal money.

### *Note...*

Counties not listed in one of these three boxes received from \$100,000 to \$500,000 in federal funds.

### *Counties receiving \$1 million or more...*

Blaine	\$1.0 mil
Big Horn	2.0 mil
Cascade	5.3 mil
Flathead	4.2 mil
Gallatin	2.6 mil
Glacier	2.1 mil
Hill	1.6 million
Lake	2.1 million
Lewis and Clark	3.8 million
Lincoln	1.2 million
Missoula	5.2 million
Ravalli	2.1 million
Roosevelt	1.9 million
Rosebud	1.3 million
Silver Bow	2.2 million
Yellowstone	7.1 million

**Total: \$45.7 million**

### *Counties receiving less than \$100,000...*

Carter	\$68,461
Garfield	64,418
Golden Valley	86,794
Liberty	99,025
Meagher	86,299
Petroleum	32,780
Prairie	97,882
Wibaux	74,853

**Total: \$610,512**

### *Counties receiving \$500,000 or more ...*

Carbon	\$511,873	Phillips	\$511,513
Custer	782,689	Pondera	694,542
Dawson	729,897	Powell	727,800
Deer Lodge	612,332	Richland	764,286
Fergus	832,519	Sanders	759,914
Park	880,035	Valley	640,084

**Total: \$8,458,595**

For every \$1  
Montanans  
paid in  
federal  
taxes  
in 1994,  
Montana  
received  
\$1.62 back.  
A return of  
62 percent  
on an  
investment  
is a good  
deal — in  
everyone's  
book.

## Montana's federally funded education programs

### Title I—Helping Disadvantaged Children

- Over \$27 million was used to expand and improve educational and family literacy programs for students most likely to fail academically.

### Title II—Dwight D. Eisenhower Professional Development Program

- During the 1995-96 school year, \$946,956 was used in Montana schools to improve teacher training, primarily in mathematics and science.

#### *ed fact...*

Over 20,000 students were served and 700 FTE were employed in Montana schools during the 1995-96 school year with Title funds.

#### *ed fact...*

Montana's schools received over \$25 million in Title I funds during the 1995-96 school year.

### Title IV—Safe and Drug-Free Schools and Communities

- Over \$1.5 million was used during the 1995-96 school year to strengthen programs in Montana schools and communities that prevent violence and illegal use of drugs by Montana youth.

### Title VI—Innovative Education Program

- During the 1995-96 school year, over \$1.5 million was distributed to schools for school improvement activities.

### Title VII, Part C—Emergency Immigrant Education Program

- Assists Montana school districts with unexpectedly large increases in the student population due to immigration.

#### *ed fact...*

On the average, Montana schools serve school lunch to 75,650 students every day.

### Learn and Serve Montana: K-12 School-Based Program

- This program expands opportunities for Montana students to participate in structured community service projects in their local towns and schools.

### McKinney Homeless Assistance, The Education of Homeless Children and Youth

- This program ensures that homeless children and youth in Montana have access to a free and appropriate public education through activities such as tutoring.

#### *ed fact...*

During the 1995-96 school year, 1,631 Montanans worked four or more hours each day to serve over 14 million school lunches and over 2 million breakfasts to Montana's school children.

### School Foods

- In Montana schools, \$15.6 million in federal money was used both to provide a subsidy for the nutritious meals Montana's students eat at school and to provide special assistance for free and reduced-price meals.

#### *ed fact...*

**I**n the 1995-96 school year, Montana schools used almost \$8 million in federal funds to serve Montana children with disabilities.

### Vocational Education

- During the 1995-96 school year, Montana school districts used \$3.5 million to help prepare Montana students for employment and to adapt to the changing needs of the world of work.

### Job Training Partnership Act and Jobs Program

- This program provides training to upgrade basic education to adults in Montana communities who are displaced workers or who are seeking employment.

#### *ed fact...*

**U**sing federal, state, and local funds, 2,324 FTE provided services to 18,364 Montana children with disabilities during the 1995-96 school year.

### Special Education—Individuals with Disabilities Education Act (IDEA), Part B—Entitlement Funds and Preschool Grants Program

- Over \$7.9 million was used by Montana schools to ensure that all children with disabilities, beginning at age three, have available a free, appropriate public education.

#### *ed fact...*

**I**n the 1995-96 school year Montana schools served 1,126 children with emotional disturbance.

### Adult Basic Education

- Academic instruction for adults (16 years of age or older) in local communities.

# The Office of Public Instruction

## *What does OPI do?*

**T**he Superintendent of Public Instruction advocates on behalf of the children of Montana and provides leadership in areas of educational accountability, educational improvement and leadership, and technical assistance.

### *Educational Accountability*

- Administer and account for \$500 million state and federal funds each year;
- Make sure that Montana's schools meet Montana's legal requirements (e.g., accreditation standards and teacher certification);
- Develop and recommend standards for teacher education programs;
- License teachers and school administrators;
- Administer recognition programs that identify exemplary schools and teachers; and
- Help poorly performing schools to improve academically, fiscally, and legally.

### *Educational improvement and leadership*

- Develop and implement efficient uses of technology to improve teaching and learning, and to allow schools to take advantage of accurate and timely communication and financial reporting;
- Resolve legal controversies that are appealed from local school districts;
- Guide school staff in developing curriculum and assessments based on best educational practices and recommend standards of accreditation for all schools;
- Provide ongoing training for teachers, school administrators, staff, and trustees in Montana in order to improve both teaching and learning in Montana schools;
- Form partnerships with community organizations, including the Montana Parent Teachers Association, the Montana Chamber of Commerce, and the Montana Broadcasters Association;
- Secure public and private grant funds to assist in meeting the needs of Montana's students and schools; and
- Secure financial programs and assistance for students with a wide variety of special needs.

## *What is the Office of Public Instruction?*

**A**n elected state superintendent leads Montana's Office of Public Instruction.

**C**urrently, 116 people work at OPI to provide services to 164,560 students in 462 school districts, whose enrollments range from one to 10,836 students, located in an area the size of New Jersey, New York, Pennsylvania and Ohio combined.

**T**he state department of education and the state superintendent are accountable to all Montanans for the state of their schools.

#### *Technical Assistance*

- Help Montana schools to meet local, state and federal requirements and provide all of their students with the best possible education by:
  - ✓ visiting schools and providing teachers, administrators, and staff with feedback;
  - ✓ developing and providing ongoing training and staff development;
  - ✓ providing assistance whether it be helping a school clerk understand the fiscal reporting process, helping a school district get their computers back on-line, or helping a school trustee understand the legal implications of a specific school policy;
  - ✓ referring schools, teachers, and students to the resources and information they require; and
  - ✓ developing, printing, and distributing publications on a variety of topics important to schools and education in Montana.
- Guide local school boards in the development of school policies and budgets;
- Assist with local curriculum development;
- Support and advance the use of current technology which allows isolated rural schools to access many educational resources and expand their students' opportunities to learn; and
- Provide training in school accounting procedures and electronic reporting.

# METNET

Montana's Educational Telecommunications Network

**T**he Montana Education Telecommunications Network (METNET) provides telecommunications and educational services to over 4,000 Montana citizens, state government employees, and schools. Some of the services Montanans can access through METNET follow.

- K-12 students throughout the state use METNET for distance learning and collaboration between schools in Montana, other states, and nations.
- METNET is used extensively by Montana's universities to train teachers and students in teacher preparation programs.
- Teachers and administrators throughout Montana collaborate on curriculum development, administrative duties, and other education issues on the METNET system.
- The METNET bulletin board system (BBS) delivers information to Montana schools on special contracts for hardware, software, surplus computers, and assistive technology.
- METNET is host to vast amounts of information about training opportunities for teachers, and related opportunities.
- The METNET BBS provides services to users via the Internet and the state government backbone network with over 200 available network connections. Users who do not have a network connection can access METNET via 22 telephone lines.

## *State BBS now on METNET*

**S**ince November 15, 1996, the Montana State Government bulletin board system is also operated within the METNET system.

- The Montana Department of Administration approached METNET's administrators to take over the State BBS because the department found METNET to be the flexible, user-friendly system they wanted for the State BBS, but had been unable to develop with the department's current resources.
- The State BBS provides Montana citizens with access to state government agencies, agency information, and legislative information.
- METNET also maintains an Internet home page and file transfer protocol (FTP) site to allow broader access to Montana education and state government information.

## *Some METNET facts...*

- On October 23, 1996, a typical day before the State BBS was added to METNET:
  - ✓ 957 people logged on to METNET, and 22 of them were new users; and
  - ✓ 62.36 megabytes of information were downloaded to users' computers (or the equivalent of 1,878 pages of information).
- In September 1996, there were 6,000 completed calls to the METNET toll-free lines. That month, 11,534 dialed but got a busy signal.
- Since METNET has been administering the State BBS (and an additional seven toll-free lines) the number log-ons in a typical day has increased to about 1,500.

01/13/97

1995-96 Federal Funds Assist Schools to Respond to Community Needs

**I**t costs Montana taxpayers nearly six times more to keep a youth in custody in Montana than to educate that youth in one of our public schools. Pine Hills costs about \$28,000 per year, per student. A public school costs \$5,000 per year, per student.

---

*“ I’ve been down for 17 years and I’ve come to the conclusion that about 70 percent of these people, the inmates, wouldn’t be here if they had had an education in the first place. ”*

*—Inmate at  
the Montana  
State Prison*

---

**Nancy Keenan, Superintendent  
PO Box 202501  
Helena, MT 59620-2501**

225 copies of this public document were published at an estimated cost of \$2.69 per copy, for a total cost of \$605, which includes \$605 for printing and \$.00 for distribution
